

AUDIO DIGITIZATION AND TRANSFER

Digitization of audio assets is a necessity today for any national or local library, museum and institution, public or private.

We provide audio content digitization, using the highest standards of production.

SERVICES

1 - TAPE DIGITIZATION

We digitize any analog audio tape format:

- mono and stereo • reel-to-reel and cassette
- ¼ inch and ½ inch reel-to-reel tape • from 15/16 ips to 30ips speeds

2 - DISC DIGITIZATION

We digitize any analog audio disc format:

- vinyl, shellac and lacquer discs • 7" to 20" diameter discs
- 16 2/3rpm to 90+ rpm speeds • any equalization curve (RIAA, Columbia, HMV,...)

3 - DIGITAL FORMAT TRANSFER

- Transfer of any digital format: DAT, PCM1630, DASH, PCM F1, DTRS, MD...
 - Exact Audio CD extraction

4 - SPECIAL AND UNUSUAL FORMATS

- Wire recordings • Microcassette • 8-track cartridges
- Fidelipac • L-cassette • Any weird format with sound recorded on it...

EQUIPMENT, STAFF AND FACILITIES

We use the best playback equipment

- Studer analog tapes machines, with direct access to spare parts. • EMT, Thorens and Esoteric Sound turntables with a wide range of cartridges and styli and outboard preamplifiers. • Prism ADA-8XR converters • Proprietary production and quality control tools • Unitary production: each audio document is thoroughly listened to during digitization
 - Experienced staff with the ability to clean, play back and listen to even the most difficult carriers. • Digitization projects can be run in the 10 studios of our facilities near Paris, or onsite.
